Instructions for Using the Automatic Telephone

The operation of the automatic telephone is very simple and no difficulty should be expected in learning how to use it. Though the operation is simple it is very important that our subscribers read and observe carefully the few following instructions, suggestions, and cautions.

Good service depends entirely on the correct operation of the telephone.

THE CALLING DEVICE

The calling device on the Automatic Telephone operates and controls the machinery in the central office.

Only three parts of this calling device are employed by the subscriber when making a call—they are:

1. The Finger Dial.
2. The Number Plate (under finger dial).
3. Finger Stop.

(1.) THE FINGER DIAL, with ten circular openings for the tip of the index finger (which shall always be used in making a call) revolves over the number plate directly behind it.

(2.) THE NUMBER PLATE, contains all the numerals (1 to 0 inclusive) required to make a call. These numerals, or combinations of them, make up the subscribers numbers as listed in the directory.

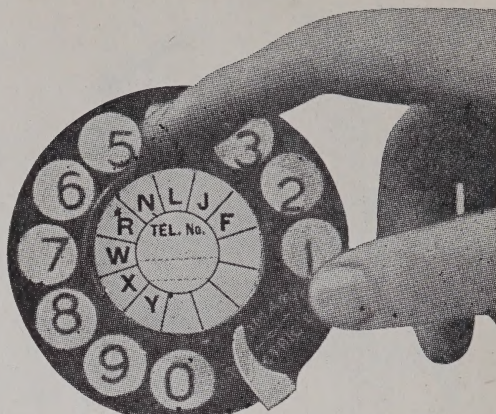

(3.) THE FINGER STOP, stops the index finger at the proper place when revolving the dial while making a call.

HOW TO CALL A NUMBER

Cut String Holding Dial at Finger Stop.

After obtaining correct number from the new directory, proceed as follows:—Don't forget! consult new directory,—all old numbers have been changed.

FIRST remove receiver from hook being careful not to "jiggle" the hook while doing so, no call can be made until receiver is removed. Place receiver to the ear and listen for dial tone, to be sure that line is clear and no other parties are using it. The dial tone is a humming sound, indicating that equipment is ready

Inserting tip of index finger in circular opening in Finger Dial over number "4" on number plate.

to receive your call, like operator saying "number please."

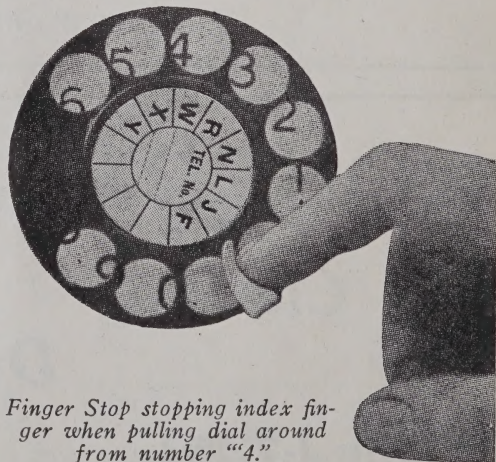

SECOND if the line is clear, and the number to be called, for example, is F4183, place tip of the index finger of the right hand in the opening in the finger dial opposite the letter F and turn the dial around clock wise, until the finger strikes the finger stop, then let it go, allowing the dial to return freely to its normal position.

THIRD place the same finger in the opening over the figure 4 and again turn the dial around until the finger strikes the stop, letting it go as before.

FOURTH perform same operation with the figures 1, 8 and 3 then place receiver to ear and listen.

RINGING SIGNAL—If the number called is not busy, an intermittent purring sound will be heard, which indicates that the bell of called party is being rung. It will continue to ring intermittently until the party has answered or until you hang up the receiver.

BUSY SIGNAL—If called party is busy, a rapid interrupted buzzing sound will be heard. In such cases hang up the receiver, which releases the connection, and then make the entire call over again after waiting a reasonable time.

Finger Stop stopping index finger when pulling dial around from number "4."

When calling a party line station, this busy signal indicates only that the line is busy and not the individual subscriber.

When the busy signal is heard, the connection has not been completed, and cannot be completed by waiting for the signal to cease. The receiver must be restored to the hook and entire call made over again later.

The busy signal can be heard if you call your own number.

DON'T ANSWER—If called party does not answer after a reasonable time, restore receiver to hook and the connection will be released. Call again later.

SPECIAL INSTRUCTIONS TO PARTY LINE SUBSCRIBERS

To call a party on your own line **DO NOT** call the regular directory number as such calls must be made in a **SPECIAL** manner.

Proceed as follows:

Remove receiver and listen for dial tone in usual manner; if line is clear dial this special number 110 and also the last numeral of your own number and the last numeral of the number of the party you wish to call—then **HANG UP YOUR RECEIVER**.

Both telephones will start ringing alternately—yours and the party's you are calling.

When your bell stops ringing the called party has answered, remove your receiver and talk.

If called party does not answer remove your receiver for a second, which stops the ringing and disconnects the call.

All telephones having numbers with the letter and first three numerals alike are on the same line.

TO REPORT A FIRE

Remove receiver and dial 112.

Fire department will receive your call. Give location and nature of fire promptly, also your name and address if time permits. Keep cool. Lives and valuable property may depend on your ability to give the fire department full and correct information.

TO CALL POLICE

Remove receiver and dial F113. Police department will receive your call.

TO CALL RURAL SUBSCRIBERS

Remove receiver and dial 7. Rural operator will receive and complete your call to all subscribers in the rural district. When she answers, give her the number of the rural subscriber desired.

TO REPORT TROUBLE

Remove receiver and dial 8. The repair clerk will receive your call; she is equipped to give prompt attention to any complaint about the service, therefore the company urges all subscribers to report service trouble to her without delay.

TO OBTAIN INFORMATION ABOUT SUBSCRIBERS NUMBERS WHICH DO NOT APPEAR IN THE DIRECTORY

Remove receiver and dial 9. The information operator will receive your call. She is provided with the very latest information about subscribers numbers and will cheerfully give number of any subscriber not appearing in the directory.

TO CALL LONG DISTANCE

Remove receiver and dial "0." Long distance operator will receive and complete your call.

CAUTIONS AND SUGGESTIONS

1. Be sure to get correct number from new directory.

2. Before starting to dial a number, always remove the receiver and listen for dial tone to be sure no one else is using the line,—no numbers can be dialed if the receiver is on the hook or if someone else is on the line.

3. When removing receiver from the hook, be very careful not to "jiggle" the hook in any way,—such "jiggling" will cause wrong numbers to be called.

Further—Any movement of the hook while dialing or talking will cause disconnects or wrong numbers. Don't move it at all, except to remove or replace the receiver.

4. Always use the tip of the index finger to operate the dial, never use a pencil or other implement.

5. Always pull dial around until finger strikes the finger stop.

6. Always hang up receiver for a moment, to disconnect entirely. If any of the following errors are made, then dial complete number all over again:—

If finger slips while dialing.

If a mistake is made while dialing.

If the wrong number is being dialed.

If in doubt about figures dialed.

7. Always remove the finger from the dial after each turn, even if the same figure is to be dialed several times in succession.

8. Never hurry or retard dial while it is returning to normal position,—it is adjusted to operate at a fixed rate of speed, any interference with its return may result in wrong numbers.

9. Do not operate the dial in any way after dialing has been completed, call may be disconnected.

10. When making several calls in succession always hang up receiver for a moment to disconnect between each call.

11. Be careful not to reverse figures while dialing a number. For example: 3256 may easily be dialed instead of 2356. The switches will connect the number you dialed,—not the number you thought you dialed.

12. Never leave receiver off hook when telephone is not in use,—if this is done, the telephone cannot be called.

13. If you get a wrong number, you have likely made a mistake, hang up receiver for a moment, then dial the correct number—all over again.

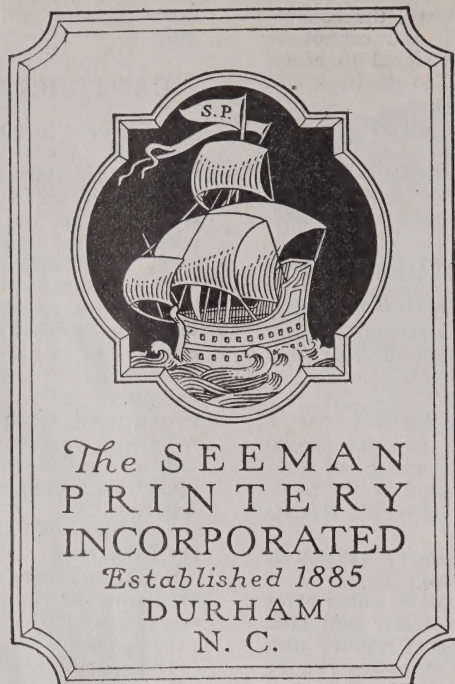

14. Give the called party a chance to answer your call, he may be unable to answer promptly. Let the ringing signal repeat at least five times before hanging up your receiver.

15. In answering a call say, for example, "Mr. Jones speaking" or "Smith and Company, Jones speaking," this method of answering identifies you immediately and saves time.

If the foregoing information is not entirely clear a personal demonstration may be obtained at the office of the telephone company or at the subscriber's premises.

LONG DISTANCE RATES FROM DURHAM

The rates quoted below show the application of the different classes of telephone toll message service to some nearby and long distance points most frequently called. Rates to over 70,000 other points may be obtained by asking for Long Distance Operator.

To make a long distance call, remove receiver and dial "O." When the long distance operator answers give her the name of the town or city desired. If you wish to file a **Station-to-Station** call, notify the operator that you will talk with any one who answers the telephone at the desired address. If you wish to file a **Person-to-Person** call, give the operator the name of the particular person wanted. In either case, furnish the telephone number desired (if known), otherwise give the firm name or name and initials of the person under whose name the telephone is listed and if possible, the street address. Then give the number of the telephone from which you are calling and your name.

The rates given below are for the initial period of three minutes. The report charges apply only to person-to-person, appointment and messenger calls which are not completed. Evening and night rates apply only to station-to-station calls.

DURHAM N. C. to	STATION-TO-STATION Charges can be reversed			PERSON-TO-PERSON Charges can be reversed

Winston-Salem, N. C..	.60	.45	.35	.80	1.00	.15

An initial period of 5 minutes is allowed on all calls where the Station-to-Station rate is 25 cents or less.

CLASSIFIED LONG DISTANCE TOLL SERVICE

The toll service offered by the company is so classified as to give the patron an option as to the class of call best suited to his particular requirement in each instance. The schedule of rates is so designed that telephone users may secure the maximum service at minimum cost. If patrons will study their needs and the conditions pertaining to their toll calls, they will be able to practice many economies through applying the class of toll call appropriate to their needs.

A careful perusal of the explanation of the various classes of service given below will enable subscribers to apply the service to the best advantage.

Evening and Night Rates apply to Station-to-Station service only.

Evening Rates:—Between 7:00 P. M. and 8:30 P. M.

Night Rates:—Between 8:30 P. M. and 4:30 A. M.

Minimum "Evening" or "Night" rates, 25 cents.

In applying Day, Evening and Night rates the time of day at the originating point shall govern.

The time at which connection is established governs the rate in determining whether the Day, Evening or Night charge applies.

If connection is established in one period and terminates in another, the rate in effect at the time the connection is established applies to the entire message.

STATION-TO-STATION SERVICE

The person originating the call does not specify a particular person to be reached, but gives only the number of the telephone called, or the name or address under which the telephone is listed.

Charges for station to station calls shall begin from the moment communication is established between the called and calling station. On calls to Private Branch Exchange systems where, at time of giving call, no particular extension station is specified to be reached, the charges begin when the Private Branch Exchange Operator answers. When the call is made for a particular Private Branch Exchange extension station, the call becomes a Person to Person call.

PERSON-TO-PERSON SERVICE

The person originating the call specifies a particular person or Private Branch Exchange extension station to be reached.

Charges for person-to-person calls shall begin from the moment communication is established with the specified person called.

Orders for person-to-person calls are accepted only under the condition that a limited charge will be made when under certain conditions it is impossible to establish communication between specified persons. (See Report Charges.)

Appointment Calls.—An appointment call is a person-to-person call on which communication is to be established at a specified time.

Messenger Calls.—A messenger call is a person-to-person call requiring the use of a messenger to bring the specified person to a public pay station.

REPORT CHARGES

A report charge shall be made on person-to-person calls which can not be completed for the following reasons:

If the called party refuses to talk.

If the calling party refuses to talk when the call is ready for completion.

If the called party is not available at the called station.

If, when the call is ready for completion, the calling party is absent at the calling station or no answer can be obtained from the calling station.

If a collect call is not completed because the called station or called party refuses to accept the charge.

If, on an appointment call, the call is not completed after the appointment has been made.

If, on a messenger call, the call is not completed after the arrangements have been made to notify the called party to come to the telephone.

A Report Charge will not be made for reports that the called station is "busy," "out of order," or "don't answer." Nor will a report charge be made for reports that the called party has no telephone, or that his telephone has been discontinued.

If the call is uncompleted during the day filed and, at the request of the calling party, the call is carried over and completed the next day, no report charge is made.

A Report Charge shall not be made in any case where the calling station orders the call cancelled prior to being given a report that the called party can not be reached or that the connection is ready.

Regardless of the number of reports made on a call for a particular party in a given city or town, only one report charge, when applicable, is made if the call is uncompleted.

On uncompleted collect calls involving a Report Charge, the charge shall be made against the calling station unless its reversal was requested at the time the report was given and the called station agreed to accept the charge.

Where private branch exchange systems are involved, the terms "station," "calling station" and "called station," as used throughout these classifications, refer to the private branch exchange switchboard operator.

Service Connection Charges and Charges for Moves and Changes

Experience and careful investigation of the entire subject has demonstrated the fact that certain service connection charges covering to some extent the average cost of the initial expense of establishing service for new subscribers and of furnishing additional facilities to old subscribers should be paid by such subscribers and should not be borne by the entire body of telephone users. Therefore, a uniform schedule has been prepared which embodies rates that should not retard telephone development in any section and will place upon subscribers responsible therefor a portion of the costs incident to such service connections, leaving the balance as a charge on the business generally. This schedule applies as follows:

SERVICE CONNECTION CHARGES

- | | |
|--|--------|
| 1. For Individual and Party Line Service..... | \$3.50 |
| 2. For each extension station connected with any class of telephone service | 3.50 |
| 3. For Private Branch Exchange Service the charge for establishing service connection: | |
| (a) For each trunk line connecting the Private Branch Exchange with a central office | 3.50 |
| (b) For each telephone connected to the Private Branch Exchange except Operators' Telephone Sets..... | 3.50 |
| 4. To cover in part Directory, Accounting, Circuit and Switchboard expenses in cases where service is established by the use of instrumentalities already in place in the Subscriber's premises and no change is made in the type or location of such instrumentalities, \$1.50. | |

CHARGES FOR MOVES AND CHANGES

The charges for moves and changes in equipment will be as follows:

1. For moving a telephone set from one location to another on same premises, a charge of \$3.00.
2. For moving any other equipment or wiring from one location to another on the same premises, a charge based on the cost of labor and material.
3. For change in type or style of telephone set, a charge of \$3.00.
4. For other changes in equipment or wiring, a charge based on the cost of labor and material.

Telephones listed as a residence telephone and rated as a residence telephone but that are advertised as a business telephone will be charged for at a business rate.

INTERSTATE TELEPHONE AND TELEGRAPH CO.

Party-line subscribers are requested to observe the contract limit of five minutes on local conversations as others on line are often waiting for it.

Note the Following Rules

Emergencies

In case of sickness, fire or other emergency, employees of this company will cheerfully extend aid to subscribers in summoning assistance or obtaining information. It is understood that such services are given as an accommodation to the subscriber, for which the company cannot assume responsibility of any nature.

Listing of Subscribers' Names

The company assumes no liability for damages accruing from errors or omissions in making up or printing of the Directory, nor can it guarantee the permanency of call numbers assigned or to be assigned.

Long Distance

1. The tolls for long line conversations are charged to the subscribers at whose phone they originate. Subscribers, to protect themselves, must see that no use unauthorized by them is made of their telephones.

2. Toll rates are for a conversation of three (3) minutes. Each additional minute is charged for.

3. Always tell the operator the *name of the party you wish to speak with*. If you ask for a given number, firm or corporation, and a response is received from the telephone called for, the conversation will be charged for, even if the party wanted is not in.

REQUEST—REPORT ALL TROUBLE TO COMPLAINT OPERATOR.

Party-line subscribers are requested to observe the contract limit of five minutes on local conversations as others on line are often waiting for it.

The Best Way to Use Your Telephone

THE TELEPHONE COMPANY and its subscribers are mutually interested in everything that will assist in bringing the telephone service to the highest possible standard of efficiency.

One of the readiest means of accomplishing this is a better knowledge on the part of the subscribers of the best way to use a telephone.

Two persons have a part in every telephone call: Yourself, and the person at the other end of the wire. If each of these does his or her part correctly, a successful connection will result; on the other hand failure of any one to observe the proper procedure is likely to be the cause of annoyance and loss of time.

When two persons are face to face, gestures, smiles and bows are the indications of good will and courtesy that assist the spoken word, but in a telephone conversation evidences of good will can only be expressed in the choice of courteous words and the tone in which they are spoken. It is, therefore, most essential that we be more than ordinarily courteous in our dealings over the telephone.

LOCATION OF FIRE ALARM BOXES

- | | |
|-------------------------------------|-------------------------------------|
| 13. Trinity and Buchanan Road. | 311. N. Mangum and Lynch Sts. |

One Tap of Bell, Test; Three Taps, Under Control; Four Taps, for Police; Ten Taps, for Militia.

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible on each side of the central binding crease. The paper appears slightly aged or off-white.
